

01 · BRAND PLATFORM

What Kadr stands for

For IT services and staffing firms in the Gulf whose people work at client sites, Kadr is the HR system that runs each person on their client's calendar. Other HR and payroll tools assume one company calendar. Kadr applies each client's work week, holidays, shifts and overtime automatically, so the month closes without a spreadsheet per client.

PURPOSE

Make fair, correct working time the default for people who work away from their own company.

PROMISE

Assign someone to a client and everything else follows: calendar, hours, overtime, approvals.

PERSONALITY

Direct, capable, organised, confident. With employees it is also warm (see Voice).

ENEMY

The spreadsheet per client, and the chasing at month-end that comes with it.

BRAND ARCHITECTURE

Kadr by EMS

Kadr is the product brand. EMS appears as an endorsement on the sign-in screen, in the footer, in sales material and in contracts, where EMS's delivery and 24/7 support become part of the offer.

Features keep plain names, not sub-brands: **Timesheet, Time off, Clock, Placements, Close month, Reports**. The only other names are platforms: Kadr for web and Kadr Mobile.

WHY THE NAME WORKS

كادر / cadre

In Arabic, كادر means the staff or team of an organisation. In English, “cadre” is a trained core team. Both meanings describe the same thing, so the name reads the same in both markets without translation.

Say it **KAH-der**. In Latin script, always write **Kadr**, never KADR in running text, Kader or Cadre.

02 · MESSAGING

What we say, and to whom

TAGLINE	Your people, on your clients' time. · فريقك على توقيت عملائك.
ONE-LINER	The HR system for teams that work at client sites.
VALUE PILLARS	Follows the client. Each person's work week, holidays, Ramadan hours and overtime come from the client they're placed with.

- **Closes the month.** Approved hours become a Finance-ready export, with an audit trail behind every change.
- **Arabic and English, properly.** Designed right to left from the start, not translated at the end.

PROOF

Rules engine for client calendars · Sun–Thu weeks and Hijri-aware holidays · manager approvals · month-end close with Excel export · audit log on every change · built and supported by EMS

OPERATIONS / DELIVERY HEAD

“Place someone with a new client and their calendar switches over the same day. No new spreadsheet.”

FINANCE

“Month-end closes from approved hours, with overtime under each client's rules and an export your payroll team accepts.”

HR

“Leave, attendance and timesheets in one place, in Arabic and English, with a record of every change.”

EMPLOYEE

“Clock in, see your week, ask for leave. Your client's calendar is already set up.”

ELEVATOR PITCH · ENGLISH

Kadr is an HR system for companies whose people work at their clients' sites. When you place someone with a client, Kadr applies that client's work week, holidays, shifts and overtime automatically. Managers approve the week, Finance closes the month, and nobody keeps a spreadsheet per client.

ELEVATOR PITCH · ARABIC

كادر نظام موارد بشرية للشركات التي يعمل موظفوها لدى عملائها. عند تعيين موظف لدى عميل، يطبّق كادر أيام العمل والإجازات والورديات والعمل الإضافي الخاصة بذلك العميل تلقائياً. يعتمد المدير الأسبوع، وتُقفل المالية الشهر، دون جداول منفصلة لكل عميل.

BOILERPLATE (PRESS, PROPOSALS, WEBSITE FOOTER)

Kadr is a bilingual HR system for IT services, outsourcing and staffing firms in the Gulf. It manages timesheets, attendance, leave and month-end close for employees placed at client sites, applying each client's calendar and working rules automatically. Kadr is built, run and supported by EMS, which delivers full-cycle software development, 24/7 production support and quality assurance for enterprises in the region.

One voice, two registers

Kadr sounds the same everywhere: plain, specific and sure of itself. The register shifts with the reader. Buyers and admins get Kadr's direct, operational tone. Employees get the warmth we borrowed from the Dawam direction, because they decide whether the data is complete.

Sales & website Direct. Lead with the problem and the number.	Admin screens Operational. Say what changed and who it affects.	Manager Brief, helpful. What needs you, and by when.	Employee Warm, first name, everyday words.	Errors Calm. What went wrong and how to fix it. No blame.
--	--	---	---	--

MOMENT	SAY	DON ' T SAY
Placement (admin)	12 people move to the Harbor Bank calendar on 1 Oct. Their week becomes Sun–Thu. ينتقل 12 موظفاً إلى تقويم بنك هاربر في 1 أكتوبر. يصبح أسبوع عملهم من الأحد إلى الخميس.	Bulk assignment operation completed successfully.
Month-end (Finance)	September is closed. 142 timesheets approved and exported. تم إقفال سبتمبر. اعتُمد 142 سجل دوام وتم تصديرها.	Period finalisation workflow executed.
Approval (manager)	3 timesheets need you before Thursday. 3 سجلات دوام بانتظار اعتمادك قبل الخميس.	Action required! Pending items detected.
Clock-in (employee)	Morning, Sara. You're at Harbor Bank today, 8:00 to 4:00. صباح الخير يا سارة. دوامك اليوم في بنك هاربر من 8:00 إلى 4:00.	Attendance event registered for resource #4471.
Leave (employee)	Your leave is approved. Enjoy the break. تمت الموافقة على إجازتك. استمتع بوقتك.	Your request has been processed.
Error	This week is already approved, so it can't be edited. Ask your manager to reopen it. تم اعتماد هذا الأسبوع ولا يمكن تعديله. اطلب من مديرك إعادة فتحه.	Oops! Something went wrong. Error 409.

placed with, at	deployed to
people, team	resources, headcount
close the month	period finalisation
time off	absence event
client calendar	policy configuration

- Use numbers, names and dates. “3 people”, not “some users”.
- Sentence case in English. No exclamation marks outside employee celebrations.
- Write Arabic first for Arabic screens, then check it matches. Never machine-translate UI.
- Address employees by first name. Address admins by the task.

- Gregorian dates in the UI, Hijri shown alongside where HR rules use it.
- Hours as **41:30**, not 41.5, everywhere a person reads them.
- Western digits (0–9) in both languages for hours and money, to match Finance exports.
To confirm with buyers.

The mark and its lockups

The mark is a team on a 3×3 grid, with one person moved out to a client. The saffron square is the product's whole idea in one shape. It always sits to the right and always stays saffron, in Arabic layouts too: a logo is never mirrored.

Primary • horizontal

Stacked

Arabic • mark on the right

Bilingual • reversed

BY
EMS
Endorsed

One colour • fax, stamps, etching

CLEAR SPACE AND MINIMUM SIZE

Keep at least **x** clear on every side, where x is one third of the mark's height (one square plus one gap). Minimum sizes: mark 20 px / 6 mm; horizontal lockup 96 px / 25 mm.

CONSTRUCTION

- Grid: 12-unit squares, 4-unit gaps, 2-unit corner radius.
- The placed square moves 6 units right from its slot, half a square. Never more, never less.
- Wordmark: Archivo ExtraBold at 112% width, uppercase, –2% tracking. Cap height matches the mark's middle row.
- Arabic wordmark is set in Noto Kufi Arabic ExtraBold as a placeholder. A lettering artist should draw the final كادر to match the mark's square geometry.

Don't recolour the placed square. It is always saffron, or the single colour in one-colour use.

Don't put the square back in the grid. Without the shift, the idea is gone.

Don't mirror the mark for Arabic layouts. Move the whole lockup, not the mark.

Don't use white on saffron (1.8:1 contrast). Use graphite on saffron.

Beyond the logo, the square is Kadr's graphic language. Use a row of squares to show a team; lift and colour the placed ones saffron. It works as a chart, a divider or a loading state. When someone is assigned, the square slides out half a step (200 ms, ease-out), the same move as the logo.

40 SEATS · 12 PLACED WITH CLIENTS · 5 OPEN

Cobalt carries, saffron points

Cobalt and graphite do most of the work. Saffron is rare on purpose: it marks the placed person, overtime, or the one thing that needs attention. If a screen has more than one or two saffron elements, it has too many.

Wide for headlines, plain for work

Archivo Expanded gives headlines the bold, stamped feel of the wordmark. IBM Plex does the everyday work, and its Arabic and Latin families were drawn together, so mixed-language screens sit on the same baseline. All fonts are free on Google Fonts under the OFL licence.

Display Archivo 800 • 112% wide 56 / 60 • Kufi 800	CLOSE MONTH	إقفال الشهر
H1 Archivo 800 • 104% 36 / 42	Placements	التعيينات
H2 IBM Plex Sans 600 24 / 32	Week 39 timesheet	سجل دوام الأسبوع 39
Body IBM Plex Sans 400 15 / 24 • Arabic 16 / 28	Your week follows the Harbor Bank calendar, Sunday to Thursday. أسبوعك يتبع تقويم بنك هاربر، من الأحد إلى الخميس.	
Data IBM Plex Mono 500 13 / 20 • tabular	SUN 27 SEP • 08:02 → 16:05 • 08:03 H	41:30 H • +01:30 OT
Label IBM Plex Mono 500 11 / 16 • +8% • caps	PLACED WITH	جهة التعيين

ARABIC RULES

- Arabic has no capitals, so labels drop the caps style and use weight 500 instead.
- Give Arabic about 10–15% more line height and 1px more size than Latin.
- Never letter-space Arabic; it breaks the joins.

HIERARCHY

- One Display line per screen at most; it is for page titles and marketing.
- Screens inside the app start at H1.
- Numbers people compare go in Data style so columns line up.

FALLBACKS

- Office documents: Arial Black (display) and Arial / Segoe UI (text), with Tahoma for Arabic.
- Email: system fonts only; use the logo image for the brand moment.

Square, straight, real

ICONS • 24 PX GRID • 1.5 PX STROKE • SQUARE ENDS

Calendar

Clock

Placement

Approve

Timesheet

Reports

Use one icon set throughout (Lucide or Phosphor with square caps are close). Saffron appears in an icon only for the placed person.

SHAPE

- Corner radius 6–12 px. Kadr's corners match the mark's slightly rounded squares; no pills or 28 px cards.
- Borders over shadows. One soft shadow is allowed, for menus and dialogs only.
- Buttons: 6 px radius, cobalt fill, white text. Secondary buttons use a 1 px border.

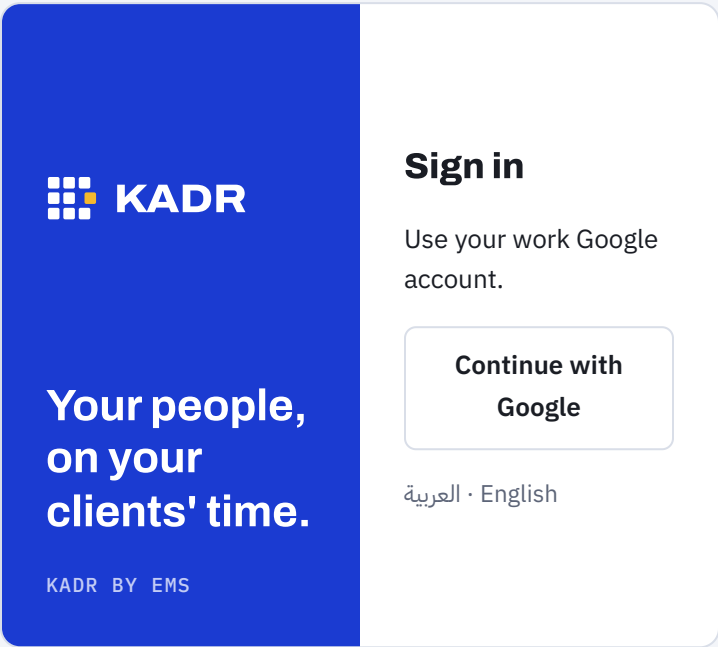

IMAGERY

- Real people at work in Gulf offices and client sites, shot in daylight. Mixed teams, as EMS teams really are.
- Crop tight on hands, screens and badges more than faces in meetings.
- No stock handshakes, no glowing networks, no people pointing at graphs.

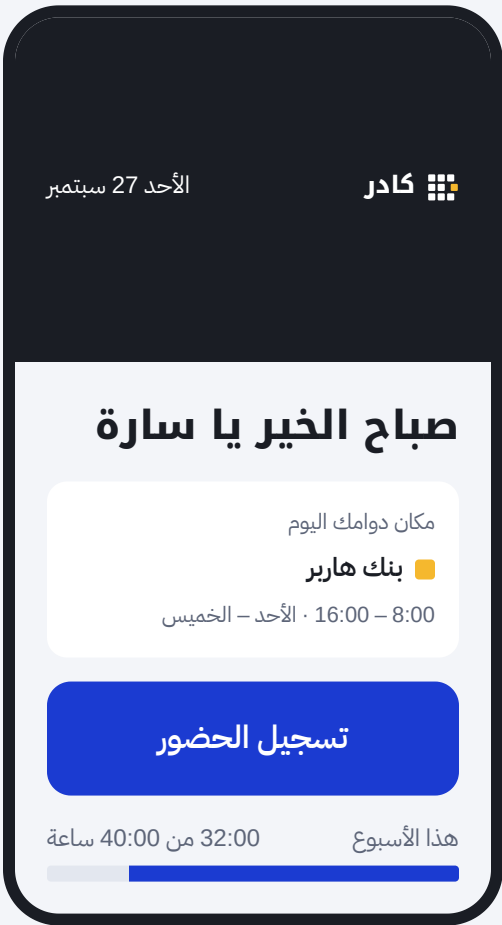

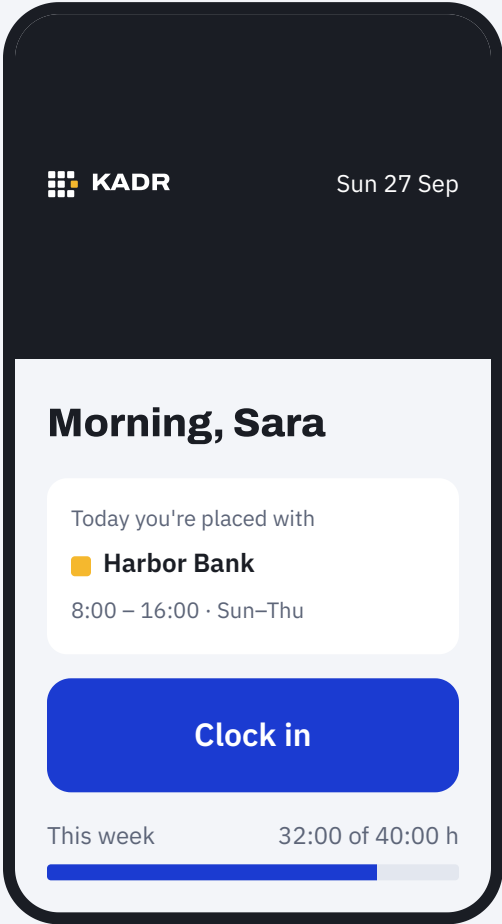

- Illustration is built only from grid squares, never from characters.

Kadr in use

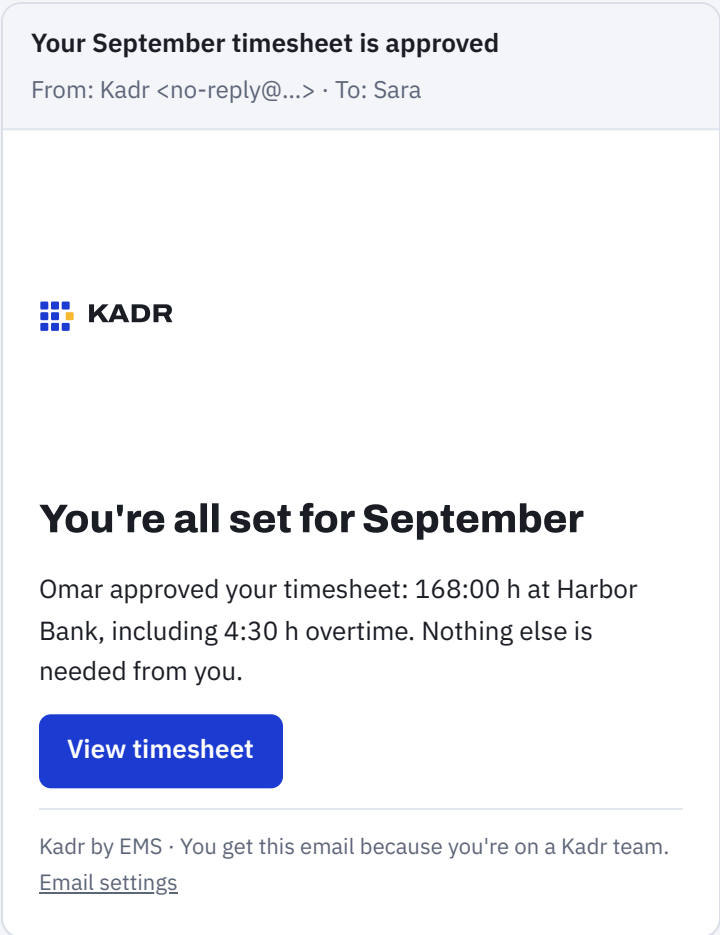

Client and people names below are examples.

Web sign-in. The cobalt panel is the one brand moment; the app itself is mostly Cloud and white.

Kadr Mobile, English and Arabic. Layout mirrors for Arabic; the logo mark does not.

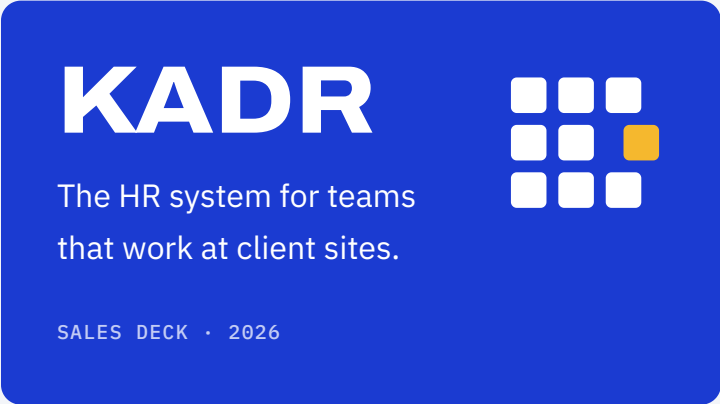

Transactional email in the employee register: first name, the numbers, one action.

Business card, 85 × 55 mm. Front cobalt, back white. Arabic on the back.

Launch post for LinkedIn. Graphite ground, the placed-square device as the only graphic.

Sales deck cover, 16:9. Inside slides use Cloud backgrounds with cobalt headlines.

Moving the app from People & Culture to Kadr

The app already keeps its colours as CSS variables and its text in the English and Arabic files, so a rebrand is mostly a token swap. These are the changes, mapped to the current code.

WHERE	TODAY	KADR
--accent	EMS lime #88C700	Cobalt #1B3BD1
--on-accent	Brand 950 #1F3201 (never white)	White. The project rule “text on green is brand-950” becomes “text on cobalt is white; text on saffron is graphite”.
--canvas / --ink	Warm off-white #FAF9F4 / #171717	Cloud #F3F5F9 / Graphite #1A1D24
--hero	Brand 950 dark green cards	Graphite #1A1D24; saffron for placed / overtime highlights
Radius	28 / 20 / 14 px, pills	12 / 8 / 6 px, squared buttons
Fonts	Plus Jakarta Sans + IBM Plex Sans Arabic	IBM Plex Sans + IBM Plex Sans Arabic; Archivo for page titles; Plex Mono for hours
appName (en / ar)	People & Culture	Kadr / كادر
Page title, favicon	EMS People & Culture, no favicon	Kadr; favicon and app icon from the mark files in docs/brand/kadr/
Sign-in	“Use your EMS Google account.”	Cobalt panel with tagline and “Kadr by EMS”

For EMS's own internal use, the app can stay “People & Culture” as the workspace name inside Kadr, e.g. “EMS · People & Culture” in the header, while the product brand is Kadr. This lets the pilot continue without a visible rename for staff.

10 · ROLLOUT

From draft to launch

- 1. Clear the name (weeks 1–3).** Trademark search for “Kadr” and “كادر” in classes 9, 35 and 42 with SAIP and GCC offices; check “Cadre” marks in HR software. Secure the domain and the app store name. Have a fallback ready, such as “Kadr HQ”.
- 2. Test with buyers (weeks 2–4).** Show the tagline, the positioning statement and the sign-in screen to 5–6 HR, Finance and delivery leads at services firms. Confirm the Arabic reads naturally and the Western-digits decision.
- 3. Finish the identity (weeks 3–6).** Refine the mark with a logo designer, commission the custom Arabic wordmark, and produce the master files (SVG, PDF, PNG) and a Figma library.
- 4. Rebrand the product (weeks 5–7).** Apply the token and text changes above behind a setting, so EMS's own pilot keeps working unchanged until launch.
- 5. Launch material (weeks 6–8).** One-page website, sales deck, a two-minute demo video of “assign a person, watch the calendar follow”, and the LinkedIn launch post.
- 6. Launch with proof.** Use EMS's own pilot results as the first case study: how many people, how many client calendars, and how long month-end took before and after.
